COMBINER

PDF Combiner is a free application that you can use to combine multiple PDF documents into one.

Three simple steps are needed to merge several PDF documents. First, we must add files to the program. This can be done using the Add files button or by dragging files to the list via the Drag and Drop mechanism. Then you need to adjust the order of files if list order is not suitable. The last step is joining files. To do this, click button Combine PDFs.

Main features:

**secure PDF merging** - everything is done on your computer and documents are not sent anywhere

**simplicity** - you need to follow three steps to merge documents

**possibility to rearrange document** - change the order of merged documents and page selection

**reliability** - application is not modifying a content of merged documents.

Visit the homepage to download the application:
